PERSONAL PROJECTS

Scholar Chat

Sep - Nov 2022

- Tect Stack Used: MERN (MongoDB, Express, React, Node)
- Live and deployed at <http://scholarchat.org>.
- A chat app for collaborating on research projects using orc ids. It has similar features comparable to chat apps like telegram and whatsapp and uses Orcids to connect, make groups and engage instead of phone numbers.

Lesson Link

Feb - May 2023

- Tect Stack Used: , MERN(MongoDB, Express, React, Node)
- An advanced learning management system to help connect teachers and students by enabling them to share resources, give and view live attendance and performance records like marks and chat using college id.

Dream Home

Feb - May 2023

- Tect Stack Used: Django for backend, React for frontend, MySQL for database
- A website to enable buying, selling, renting and managing properties and houses.

Chrome Extensions Lead

Sep - Jan2022-2023

- Role: Lad a bootcamp by GDSC(Google Developer Student Club)
- Guided and taught a group of about 30 students to build chrome extensions of their own over a timespan of about 4 months.

Time Table Automation

Aug - Nov 2022

- Tect Stack Used: Django, HTML, CSS, bootstrap, Python, SQL
- Web based software that automates the creation of our college timetable for all semesters and produces various copies specific to different professors, batches, and classrooms.

HOBBIES & INTERESTS

- Basketball
- Badminton
- Chess
